## **Section 9817- Orange County**

982	17 Orange County (GRA 3)	737
	9817.1 Response Summary Table	<u>738</u>
	9817.2 Geographic Response Strategies for Environmental Sensitive Sites	<u>741</u>
	9817.2.1 GRA 3 Site Index	<u>742</u>
	9817.3 Economic Sensitive Sites	<u>782</u>
	9817.4 Shoreline Operational Divisions	793

#### 9817 Orange County (GRA 3)

Orange County GRA 3 begins at the border between Los Angeles and Orange Counties and extends south approximately 40 miles to the San Diego County line. Most of the shoreline in this GRA is fine grain sandy beach habitat. Western snowy plovers and California least terns use these beaches for wading, foraging, and nesting activities. Information on beach nesting bird concerns can be found in the site 5-000 ACP 5 Sandy Beaches.

Access to GRA 3 is available from State, County, and City beaches along Pacific Coast Highway. The Navy may impose security restrictions in Anaheim Bay (Seal Beach National Wildlife Refuge). Primary boom placement is under the control of the Seal Beach Naval Weapons Station Commanding Officer.

## 9817.1 Response Summary Table

The Geographic Response Strategies for Environmental Sensitive Sites in GRA 3 consist mainly of utilizing boom to exclude oil entry into wetlands and prevent upstream migration of oil.

A summary of the response resources is listed by site and sub-strategy next.

#### Site Site Name Sub-PREVENTION OBJECTIVE OR CONDITION FOR DEPLOYMENT Strategy Sub-Type QTY/Unit Equipment Size/Unit 5-310 Anaheim Bay (Seal Beach National Wildlife Refuge) .1 - Exclude Oil Boom Harbor Boom 18 or 24 inch 1500 feet Staff Staff to Deploy Vessel **Boom Boat** Anchor Danforth 40 lbs 4 .2 - Exclude Oil 4 Staff Staff to Deploy Vessel **Boom Boat** Anchor Danforth 40 lbs 5 Harbor Boom 2200 feet Boom 18 or 24 inch .3 - Exclude Oil Staff Staff to Deploy 4 Vessel **Boom Boat** 1 750 feet Boom Harbor Boom 18 or 24 inch Exclude Oil 4 Vessel **Boom Boat** 1500 feet Boom 42 inch Ocean Boom Staff Staff to Deploy 4 .5 - Exclude Oil Vessel **Boom Boat** 2 Stakes 8 Staff 4 Staff to Deploy Boom 1500 feet Swamp Boom Vessel Skiff or Punt 2 Anchor Danforth 40 lbs 4 <u>5-32</u>0 Inner Bolsa Chica .1 - Exclude Oil Anchor Danforth 40 lbs 1500 feet Boom 18 or 24 inch Harbor Boom Staff 4 Staff to Deploy Vessel **Boom Boat** .2 - Exclude Oil Boom Harbor Boom 18 or 24 inch 300 feet Staff Staff to Deploy 4 Vessel **Boom Boat** 1 **Bolsa Chica - Restored Wetlands** .1 - No Onsite Options: Consider Offshore Containment/Recovery/ART .2 - Divert Oil Other Boom 18 inch 2400 feet Vessel Skiff or Punt 1 Staff Staff to Deploy 4 Stakes 2 Danforth 40 lbs 4 Anchor .3 - Divert Oil Vessel Skiff or Punt Staff Staff to Deploy 4 Other Boom 1700 feet 18 inch Anchor Danforth 40 lbs 3 Stakes

5-000-A Site Summary - ACP 5 Sandy Beaches

5-000-A

County: Orange ACP Division/Segment:

NOAA Chart: 18740 Map Book: Decimal Degrees:

#### **Site Description:**

Western snowy plover and California least tern nesting sites are seasonally occupied at various coastal beach sites. Western snowy plovers also maintain a year round presence with nesting from March to September. Beach nesting birds may have active nests, or chicks may be actively moving about the described area. All responders should be careful to minimize disturbance and to avoid causing injury to nests and chicks. Response activities must be planned and monitored to prevent injury to both birds and habitat.

#### Resources at Risk:

ESI and Habitat: 3A Fine- to medium-grained sand beaches

#### List of Resources at Risk:

## **Additional Site Summary Comments:**

Western snowy plovers are small, sparrow-sized white and tan colored shorebirds. California least terns are small, gull-like, gray, white and black colored diving birds. Western snowy plovers conceal their nests in the upper rack line above the high tide line while California least terns generally nest on open beaches and/or along estuary shorelines. Nests are usually constructed on loose sand, and are easily stepped on due to their very cryptic nature. Chicks are known to run between nests and the waterline. Western snowy plover adults forage while wading along the shoreline. California least tern adults dive into the water to forage in shallow, nearshore areas of the open coast, embayments, estuaries, and dune lakes.

Western snowy plover and California least tern bird-nesting sites are typically shallow depressions scratched out from the sand surface on sandy beaches above the highest tide line. The nest sites are typically very well disguised and difficult to see. Nest sites may contain either eggs, or chicks which are potentially vulnerable to trampling by vehicles or foot traffic. Western snowy plover adults and chicks, and California least tern chicks are known to move between the nest sites and the active water line. Over-wintering Western snowy plover adults may be foraging throughout the response area. To aid in avoiding damage to nests, consider delineation of nesting areas and designating responder "pathways" in discussion with Trustee Agencies and/or the local land manager and their biological monitors. Monitors should be present to observe and prevent any disturbance to birds/nests caused by operations. Vehicle travel on beach should be restricted to wet sand if possible; and should be slow enough to avoid and minimize impacts to wildlife (not to exceed 15 MPH).

#### **Hazard and Restrictions:**

Watch weather and sea conditions. Strong surf.

## Site Strategies:

**Strategy: 5-000.1 Objective:** Shoreline Pre-Clean: Resource Specialist Supervision Required Strategy: After approval only, pre-clean beach with hand crews to move and store kelp, driftwood, and vegetative debris above high-tide line. Collect and properly dispose of trash. Redistribute wrack after response efforts are completed. The areas to be protected should be monitored by an assigned biological monitor. Heavy equipment and 4WD vehicles may be used pending approval.

Table of Response Resources

Equipment	Sub-Type	Size	Unit	QTY Unit	Last Page Update
Staff	Natural Resource				
	Specialist				

## **Strategy: 5-000.2 Objective:** Other: See Strategy Box

Strategy: In consultation with USFWS and CDFW, Western snowy plover or California least tern eggs may be removed from nests by authorized and qualified personnel and taken to an approved facility to reduce injury.

Table of Response Resources

Equipment	Sub-Type	Size	Unit	QTY Unit	Last Page Update
Staff	Natural Resource Specialist				•

#### Logistics:

*Directions:* Most access from Pacific Coast Highway (PCH or Highway 1).

*Land Access:* Refer to coastal access mapping information to describe the best access point for response and natural resource protection. Access by crews and equipment should occur only through areas specifically designated by authorized monitoring personnel. Access points shall be minimized by size and number to reduce impacts. Site specific information will be developed during a response effort.

On-Water Limitations:

Facilities, Staging Areas, Command Posts, Available Equipment: All facilities should be selected to minimize disturbances and impacts to wildlife. All responders will be briefed on procedures for avoiding birds and nest sites.

Communications Problems: None.

Additional Operational Comments: Beaches may be pre-cleaned if given prior authorization. Some beaches have designated fenced areas for nesting. Individual Environmentally Sensitive Sites may have additional Western snowy plover and California least tern information.

5-310-A Site Summary - Anaheim Bay (Seal Beach National Wildlife Refuge)

**ACP Division/Segment:** OR - A - S002

**NOAA Chart:** 18749 **Map Book:** 826 G5 **Decimal Degrees:** 33.7313 -118.0811

**Site Description:** 

County: Orange

One of the most extensive and valuable wetlands in Orange County. Coastal lagoon, with extensive wetlands and marsh. Opening of bay has been channelized and lined with riprap, but inside bay past the Hwy1/Pacific Coast Highway bridge are extensive wetlands.

#### Resources at Risk:

ESI and Habitat: 10A Salt - and brackish-water marshes

9A Sheltered tidal flats

6B Riprap

#### List of Resources at Risk:

## **Additional Site Summary Comments:**

5-310-A

To protect endangered and sensitive species and wetland habitat. Responders should watch for and avoid nesting birds and minimize disturbances to vegetation. Avoid the spread of oil into the wetland through response activities.

#### **Hazard and Restrictions:**

The Navy may impose security restrictions in the event of a spill. This could effectively close off a portion of Anaheim Bay and deployment of the preferred strategies. Strategy 5-310.1 could be delayed until the Navy reopens this area to responders. If the Navy closes this area, alternative strategies 5-310.2 and 5-310.3 will have to be deployed. Watch weather and sea conditions.

Site Strategies: Site Validation Level: III

## **Strategy: 5-310.1 Objective:** Exclude Oil

Strategy: Use deflection boom to deflect oil.

Table of Response Resources

Equipment	Sub-Type	Size Unit	QTY Unit	Last Page Update
Boom	Harbor Boom	18 or 24 inch	1700 feet	Strategy Updated:4/28/2023
Anchor	Danforth	40 lbs	4	Last Test: 8/25/2022
Vessel	Boom Boat		1	
Vessel	Skiff		1	
Staff	Staff to Deploy		6	_

#### **Strategy: 5-310.2 Objective:** Exclude Oil

*Strategy:* Use this strategy if the origin of the spill is offshore. Towed boom array using OSRO vessels and vessels of opportunity (each boom 600' to 800') as necessary.

Table of Response Resources

Equipment	Sub-Type	Size Unit	QTY Unit	Last Page Update
Boom	Ocean Boom	42 inch	1500 feet	
Vessel	Boom Boat		4	
Staff	Staff to Deploy		4	

#### **Strategy: 5-310.3 Objective:** Exclude Oil

*Strategy:* Use this strategy if the origin of the spill is from the secure area. Use a single stretch of 18" boom to line the inlets to Anaheim Bay. This strategy can also connect to 5-320.1.

Table of Response Resources

Equipment	Sub-Type	Size Unit	QTY Unit	Last Page Update
Boom	Harbor Boom	18 inch	1500 feet	Strategy Updated:9/26/2014
Anchor	Danforth	40 lbs	4	Last Test: 2/15/2013
Vessel	Boom Boat		2	
Vessel	Skiff or Punt		2	
Stakes			8	
Staff	Staff to Deploy		4	

#### Logistics:

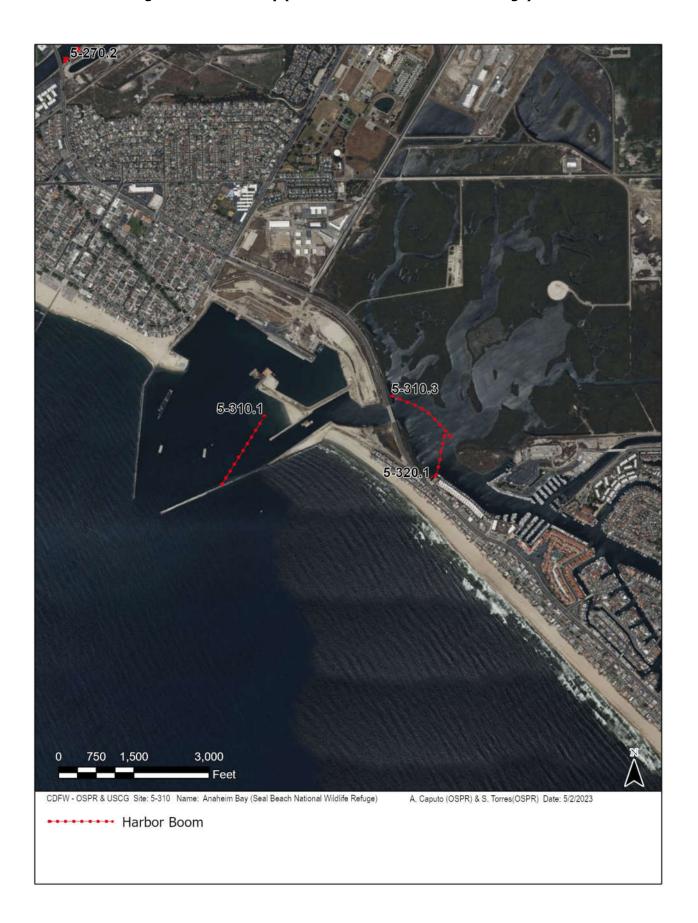

*Directions:* Boat launches available in Huntington Harbour. From Bolsa Chica St. in Huntington Beach, go west on Edinger Ave. until it ends at Sunset Aquatic Marina. Additional launching at PCH and Warner Ave. (next to Huntington Beach Fire Station No. 7).

Land Access: Land access on the Seal Beach Naval Weapons Station (SBNWS).

On-Water Limitations: Shallow water and strong currents. Heavy small boat traffic. All services available.

Facilities, Staging Areas, Command Posts, Available Equipment: Both boat launch locations have adequate space for parking and staging.

Communications Problems: None

5-320-A Site Summary - Inner Bolsa Chica

5-320-A

**County:** Orange **ACP Division/Segment:** OR - A - S002

**NOAA Chart:** 18746 **Map Book:** 857 B1 **Decimal Degrees:** 33.7084 -118.0572

**Site Description:** 

Coastal lagoon and wetlands complex (an extension of Anaheim Bay). Extensive oil field production at the southern portion of the wetland. Currently no direct connection to the ocean.

#### **Resources at Risk:**

ESI and Habitat: 10A Salt - and brackish-water marshes

10B Freshwater marshes

#### **Additional Site Summary Comments:**

Western Levee Rd will have limited access during nesting season (April-Sept) and will require biological consultation before access during this period. 40-60 Species of finfish are expected to utilize the basin.

To protect endangered and sensitive species and wetland habitat. Responders should watch for and avoid nesting birds and minimize disturbances to vegetation and mudflats. Avoid the spread of oil into the wetland through response activities.

#### **Hazard and Restrictions:**

Watch weather and sea conditions such as high energy wave action at the wetland entrance. Watch for shallow sandbars at the wetland entrance, entry channel to the east of the inner bridge, and in the basin near the launch ramp. Tidal currents can be strong and dangerous in the entry channel and throughout the wetland. Loose riprap may be a hazard for shoreline activities.

## Site Strategies: Site Validation Level: |||

**Strategy: 5-325.1 Objective:** No Onsite Options: Consider Offshore Containment/Recovery/ART *Strategy:* a) Recommended primary response strategy is on-water containment and recovery before oil reaches inlet. b) Pursue feasibility of alternative response technologies (e.g. dispersants and in-situ burning) before oil reaches the inlet.

Table of Response Resources

**Last Page Update** 

Strategy Updated: Last Test:

#### Strategy: 5-325.2 Objective: Divert Oil

*Strategy:* \*\*\*This strategy should only be used when there is enough water to safely deploy. It should be deployed only at higher tides and when there are no sandbars.\*\*\* Use deflection boom as per diagram to deflect oil to collection area at northeast corner of boom.

Table of Response Resources

#### Logistics:

*Directions:* From Pacific Coast Highway in Huntington Beach, access through Bolsa Chica State Beach or access through California Resources Corporation (CRC) one block east of Pacific Coast Highway off Seapoint Dr.

Land Access: Parking lot at Bolsa Chica State Beach for oceanside of inlet. Contact CRC for access through tidal basin side of the inlet.

*On-Water Limitations:* Shallow water and strong currents. Boat launch is available on the north side of the oil service bridge. There are no docks. Fuel is available at nearby service stations north and south on Pacific Coast Highway.

#### 5-325-A Site Strategy - Bolsa Chica - Restored Wetlands

5-325-A

Facilities, Staging Areas, Command Posts, Available Equipment: Pre-staged booms stored in containers on the north side of the oil service bridge. This boom was originally purchased for spill response during the construction phase and should not be the first choice for the above strategies. It is in metric units and is not easily deployed since it is not on trailers. Contact the DFW Reserve Manager for use of this boom.

Communications Problems: No obstructions or limitations to cell phone or radio usage in the area.

Additional Operational Comments: As the bottom profile and currents are ever-changing in the new wetland, other options for additional protection could be considered such as berming the mouth with sand and fast water booming techniques.

#### 5-330-A Site Summary - Talbert Marsh

**County:** Orange **ACP Division/Segment:** OR - B - S003

**NOAA Chart:** 18746 **Map Book:** 888 D5 **Decimal Degrees:** 33.6318 -117.96021

**Site Description:** 

Coastal lagoon and wetlands complex connected to the ocean by a riprap-lined channel. There is currently no direct connection to the Santa Ana River.

#### **Resources at Risk:**

ESI and Habitat: 10A Salt - and brackish-water marshes

9A Sheltered tidal flats

6B Riprap

#### List of Resources at Risk:

	Resource Name	Status	Presence	Sensitivity
Birds	California least tern	FE, SE	Apr-Sep	
Birds	California brown pelican	FP, SP	Jun-Oct	
Birds	Belding's savannah sparrow	SE	Year-round	
Birds	shorebirds		Year-round	
Birds	waterfowl		Sep-May	
Birds	Western snowy plover	FT, SSC	Apr - Sep	

FT-Federally Threatened, FE-Federally Endangered, FP-Federally Protected, SE-State Endangered, ST-State Threatened, SP -State Protected, SR-State Rare, SSC-Species of Special Concern, BGEPA-Bald and Golden Eagle Protection Act, SSSP-State Special Status Species

## **Additional Site Summary Comments:**

California least terns use this area during the summer months. Nesting occurs inside and outside fenced area north of the Santa Ana River. Migratory birds use this area during the winter months.

5-330-A

To protect endangered and sensitive species and wetland habitat responders should watch for and avoid nesting birds and minimize disturbances to vegetation. Avoid the spread of oil into the wetland through response activities.

#### **Hazard and Restrictions:**

Tidal currents can be strong and dangerous in the entry channel. Strategy 5-330.3 may only be deployed during a 4.5 foot tide or higher.

## Site Strategies:

Site Validation Level: |||

#### **Strategy: 5-330.1 Objective:** Exclude Oil

Strategy: Sand berm (12' high). Borrow sand from north side of Talbert Marsh channel.

#### Logistics:

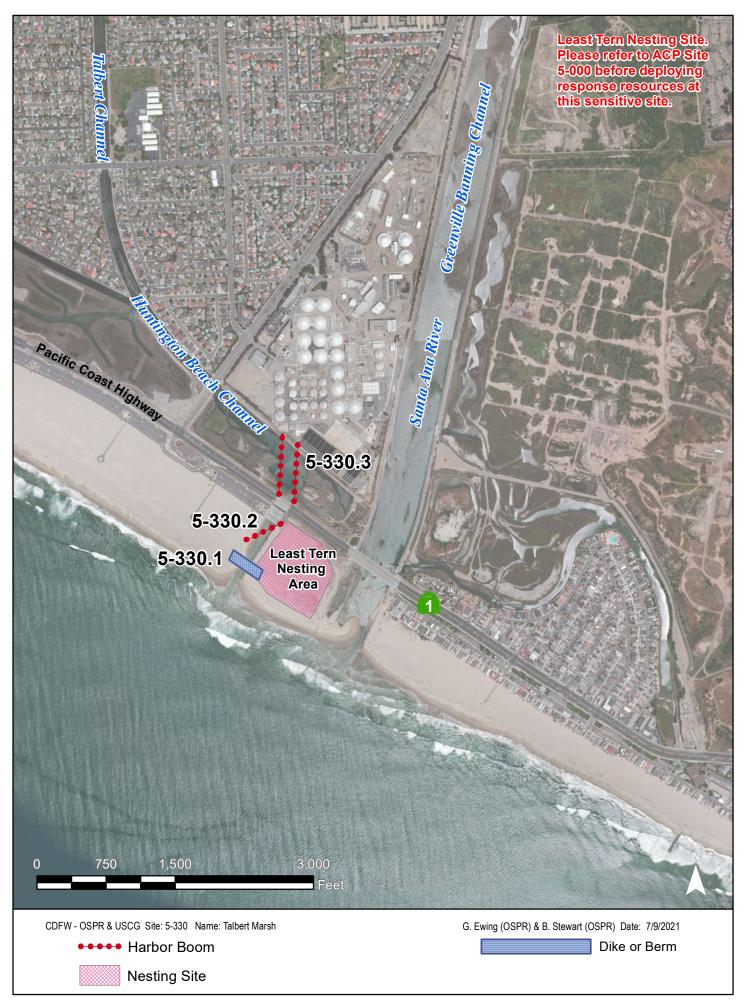

*Directions:* From PCH in Huntington Beach, go south on Magnolia St. for a few yards and you will be at the entrance to Huntington State Beach. Go to the southern end of the parking lot.

Land Access: Channel is located between Talbert Marsh and the Paciific Ocean at the southern end of the Huntington State Beach parking lot.

On-Water Limitations: Available via channel and along the Orange County Public Works utility road inside the marsh. Facilities, Staging Areas, Command Posts, Available Equipment: Parking and staging available at the southern end of the Huntington State Beach parking lot. Additional parking and staging is available along the Orange County Public Works utility road adjacent to the marsh inside the gate off of Brookhurst St.

Communications Problems: None.

Additional Operational Comments: Keep all activities to the north side of the Talbert Marsh channel to minimize impacts to the California least tern nesting site. Notify the California Coastal Commission if a sand berm is required.

5-340-A Site Summary - Newport Slough Wetland

5-340-A

**County:** Orange ACP Division/Segment: OR - B - S003 OR - B - S004

**NOAA Chart:** 18746 **Map Book:** 888 E5 **Decimal Degrees:** 33.63136 -117.95579

**Site Description:** 

Coastal lagoon and wetlands complex connected to the Santa Ana River tidal gates.

**Resources at Risk:** 

ESI and Habitat: 10B Freshwater marshes

10A Salt - and brackish-water marshes

5-365-A

5-370-A Site Summary - Aliso Creek 5-370-A

**County:** Orange ACP Division/Segment: OR - D - S006

**NOAA Chart:** 18746 **Map Book:** 951 B7 **Decimal Degrees** 33.51082 -117.75179

#### **Site Description:**

Small creek mouth located in Laguna Beach. During a portion of the year, a sand berm is present which prevents surface flows into the ocean. During winter months, storm water may breach the sand berm at the creek mouth. During this period the lower portion of the creek is subject to tidal flows and wave wash. The area adjacent to the creek mouth is a sandy beach. Site is within the following State Marine Protected Areas(s): Laguna Beach SMCA.

#### **Resources at Risk:**

ESI and Habitat: 4 Coarse-grained sand beaches

#### List of Resources at Risk:

	Resource Name	Status	Presence
Fish	tidewater goby	FE	Year-round

FT-Federally Threatened, FE-Federally Endangered, FP-Federally Protected, SE-State Endangered, ST-State Threatened, SP -State Protected, SR-State Rare, SSC-Species of Special Concern, BGEPA-Bald and Golden Eagle Protection Act, SSSP-State Special Status Species

C - Cultural, Historic, Archaeological; E - Entry/Owner/Access; O - Other; S - Safety; T - Trustee; X - Exclusion or Security

## **Additional Site Summary Comments:**

This site has been identified as being critical for the continued survival of the tidewater goby. An oil spill into this area would be significant in terms of potential impacts on a federally endangered species.

## **Concerns and Advice to Responders:**

To protect endangered species critical habitat. Avoid disturbances to the creek. Boom should be staked on the banks, and not anchored.

#### **Hazard and Restrictions:**

# **Site Strategies:**

# Strategy: 5-370.1 Objective: Exclude Oil

*Strategy:* Construct sand berm and place harbor boom inside of lagoon to deflect any oil washed over berm to collection site.

Table of Response Resources

Equipment	Sub-Type	Size Unit	QTY Unit	Last Page Update
Boom	Harbor Boom	18 or 24 inch	200 feet	Strategy Updated: 12/12/2018
Vessel	Skiff or Punt		1	<i>Last Test:</i> 12/12/2018
Staff	Staff to Deploy		2	
Skiploader				

#### Logistics:

*Directions:* Access to Aliso Creek from the adjacent Aliso County Beach. Aliso Beach is located off Pacific Coast Highway in Laguna Beach.

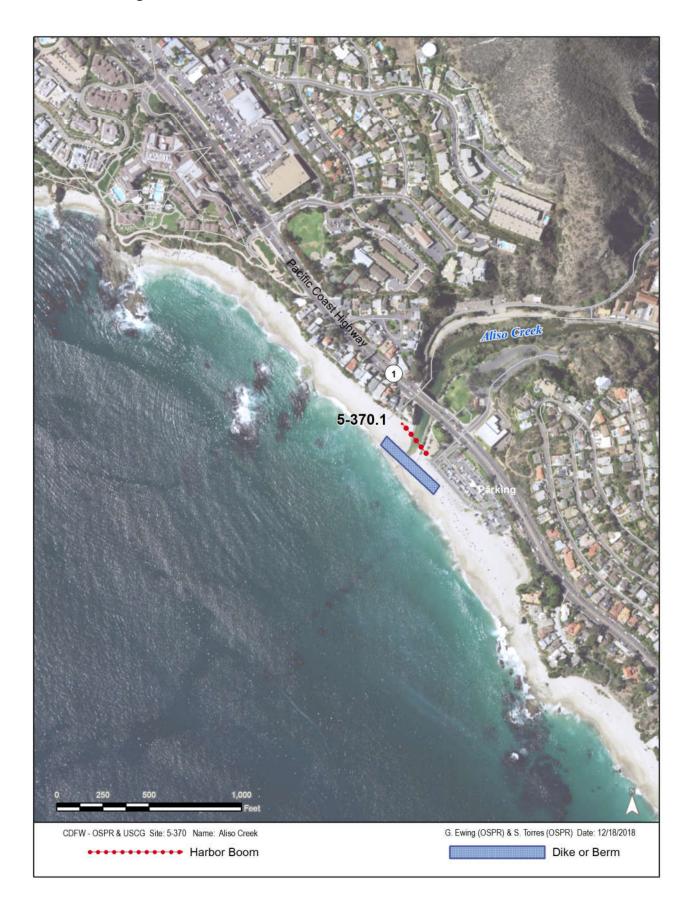

Land Access:

On-Water Limitations:

Facilities, Staging Areas, Command Posts, Available Equipment: Parking lots on both sides of PCH. The lot east of PCH may be the better staging area. Connection to beach is through a pedestrian tunnel.

Communications Problems: None.

Additional Operational Comments: Notify the California Coastal Commission if a sand berm is required.

5-380-A Site Summary - Dana Point 5-380-A

**County:** Orange **ACP Division/Segment:** OR - D - S009

**NOAA Chart:** 18746 **Map Book:** 971 F7 **Decimal Degrees** 33.4601 -117.7139

## **Site Description:**

Rocky headland with wave-cut platforms. Harbor seal and California sea lion haul-out area. Site is within the following State Marine Protected Area(s): Dana Point SMCA.

#### **Resources at Risk:**

# **Additional Site Summary Comments:**

# 5-380-A Site Strategy - Dana Point

5-380-A

## **Concerns and Advice to Responders:**

To protect sensitive species haul-out habitat.

#### **Hazard and Restrictions:**

Watch weather and sea conditions.

## Site Strategies:

**Strategy: 5-380.1 Objective:** No Onsite Options: Consider Offshore Containment/Recovery/ART *Strategy:* This site is difficult to protect. Mechanical shoreline protection techniques are not likely to be effective because of high wave energy and rocky conditions at the site.

- a) Recommended response strategy is on-water containment and recovery (e.g. towed boom arrays).
- b) Pursue feasibility of alternative response technologies (e.g. dispersants and in-situ burning) to reduce the volume of oil reaching the site.

Table of Response Resources

#### **Last Page Update**

## Logistics:

*Directions:* Boat launch available at Dana Pt. Harbor. From PCH in Dana Pt., go south on Del Obispo St. and then left on Embarcadero Pl. to the public boat launch facility.

Land Access: Access best by boat.

On-Water Limitations: Heavy small boat traffic. All services available.

Facilities, Staging Areas, Command Posts, Available Equipment: Orange Co. Dept. of Harbor, Beaches and Parks has 1500' of harbor boom staged at the Sheriff's Harbor Patrol Office.

Communications Problems: None.

5-385-A/C Site Summary - Dana Point Breakwater 5-385-A/C

## **Additional Site Summary Comments:**

During the night, this is a major California brown pelican roosting site.

#### **Concerns and Advice to Responders:**

To protect endangered and sensitive species roosting habitat.

#### **Hazard and Restrictions:**

Watch weather and sea conditions. High energy wave action.

#### **Site Strategies:**

**Strategy: 5-385.1 Objective:** No Onsite Options: Consider Offshore Containment/Recovery/ART *Strategy:* This site is difficult to protect. Mechanical shoreline protection techniques are not likely to be effective because of high wave energy and rocky conditions at the site.

- a) Recommended response strategy is on-water containment and recovery (e.g. towed boom arrays).
- b) Pursue feasibility of alternative response technologies (e.g. dispersants and in-situ burning) to reduce the volume of oil reaching the site.

Table of Response Resources

#### **Last Page Update**

## Logistics:

*Directions:* Boat launch available at Dana Pt. Harbor. From PCH in Dana Pt., go south on Del Obispo St. and then left on Embarcadero Pl. to the public boat launch facility.

Land Access: Access best by boat.

On-Water Limitations: Heavy small boat traffic. All services available.

Facilities, Staging Areas, Command Posts, Available Equipment:

Communications Problems: None.

5-390-A Site Summary - San Juan Creek 5-390-A

**County:** Orange ACP Division/Segment: OR - E - S002 OR - E - S003

**NOAA Chart:** 18746 **Map Book:** 972 A7 **Decimal Degrees** 33.46231 -117.6831

**Site Description:** 

Small coastal creek with marsh and wetlands.

#### **Resources at Risk:**

ESI and Habitat: 4 Coarse-grained sand beaches

# **List of Resources at Risk:**

	Resource Name	Status	Presence
Birds	California brown pelican		Jun-Oct
Birds	seabirds		Year-round
Birds	waterfowl		Sep-May
Birds	shorebirds		Year-round

FT-Federally Threatened, FE-Federally Endangered, FP-Federally Protected, SE-State Endangered, ST-State Threatened, SP -State Protected, SR-State Rare, SSC-Species of Special Concern, BGEPA-Bald and Golden Eagle Protection Act, SSSP-State Special Status Species

# **List of Key Contacts:**

Type	Name/Title	Organization	Phone
С	/	Office of Historic Preservation	(916) 445-7000
С	/	South Central Coastal Information Center	(657) 278-5395
